**DETAILED ACTION**

***EXAMINER'S AMENDMENT***

The application has been amended as follows: In Claim 41, line 2, "said method" has been replaced with --said system--.

***Allowable Subject Matter***

Claims 1-43 are allowed.

The following is an examiner's statement of reasons for allowance:

As to Claim 1, the prior art of record taken along or in combination, fails to disclose or render obvious flowing said separated chemical constituent into an optical detector; and measuring said chemical constituent while said chemical constituent is flowing through said detector, in combination with the rest of the limitations of the claim.

As to Claim 21, the prior art of record taken along or in combination, fails to disclose or render obvious placing said separated chemical constituent into an optical detector; measuring said chemical constituent; and recombining said separated chemical constituent and said opaque slurry particles, in combination with the rest of the limitations of the claim.

As to Claim 22, the prior art of record taken along or in combination, fails to disclose or render obvious flowing said chemical constituent into an optical detector and measuring said chemical constituent without ever contacting a fluid valve with said abrasive slurry particles, in combination with the rest of the limitations of the claim.

As to Claim 23, the prior art of record taken along or in combination, fails to disclose or render obvious said separator comprising a slurry region and a chemical constituent region; an optical detector; and a flow control system for controlling flow of said chemical constituent from

said chemical constituent region to said optical detector, in combination with the rest of the limitations of the claim.

As to Claim 41, the prior art of record taken along or in combination, fails to disclose or render obvious an optical detector; and a flow control system comprising: a conduit connecting said chemical constituent permeate region and said optical detector, and a pressure bleed port connected to said optical detector, in combination with the rest of the limitations of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. *Fisher et al* disclose a method of controlling the concentration of a component based on absorption spectroscopy measurement. Huang et al disclose a slurry filtration system for a chemical mechanical polishing system. *Connolly et al* discloses a method for measuring concentration level of a particular analyte in a moving liquid. *Farkas et al* teach a method for measuring slurry particle size during substrate polishing.
